# DHRUV SHAILESH NAIR

Data Analyst

9004353340 • nairdhruv317@gmail.com • Mumbai 401105

## Summary

Data science graduate working in trade finance operations, bridging the gap between numbers and global trade workflows. I bring a sharp eye for detail to high-volume documentation, combining analytical tools with domain context to spot patterns, minimize risk, and make day-to-day data flow a lot smoother.

IBM — Mumbai, India

Process Associate - Trade Finance — 2025 - Present

- Manage high-volume import/export documentation (Letters of Credit, Bank Guarantees), ensuring strict data integrity and compliance.
- Maintain audit-ready operational records by accurately validating and indexing transactional data across internal systems.
- Execute AML and sanctions screening on trade parties, leveraging risk patterns to safeguard operational workflows.
- Apply an analytical approach to documentation reviews, streamlining error-checking and exceeding accuracy targets.

## Skills

Technical & Analytics

- Languages & Tools: Python, SQL, Excel (Intermediate)
- Data Visualization: Power BI, Tableau
- Libraries And Frameworks: Pandas, Scikit-learn
- Version Control And  Environments: Github, Visual Studio Code

Domain & Operations

- Trade Finance Operations: Trade documentation, high-volume transaction processing, risk mitigation
- Business Analytics: Process mapping, workflow optimization, regulatory accuracy & compliance
- Data Methods: Data cleaning, exploratory data analysis (EDA), pattern recognition, reporting

## Training / Courses

IBM Data Science Methodology-IBM

IBM Data Science Tools-IBM

## Education

LR Tiwari College — Mumbai, India

Higher Secondary — 2020 - 2022

Reena Mehta College — Mumbai, India

Bachelor's in Data Science — 2022 - 2025

## Projects

### Trade Finance Sanction Clause Identifier

• Built an automated tool to scan Letter of Credit (LC) trade documents and detect compliance risks like sanctions and boycotts.
• Used TF-IDF text matching to compare incoming document clauses against standard bank reference rules with accuracy scoring.
• Created a web scraper to automatically fetch and update regulatory reference clauses from compliance websites.
• Designed an interactive dashboard with risk category filters and CSV report export functionality.

### Real-Time Sentiment Analyzer

• Developed an interactive web app that analyzes text sentiment in real time with high accuracy using deep learning.
• Integrated a pre-trained Hugging Face RoBERTa transformer model to generate confidence scores for positive, neutral, and negative sentiment.
• Trained a baseline machine learning model using TF-IDF and Logistic Regression to compare classical ML against deep learning techniques.
• Designed clean visual metric cards and probability progress bars to display real-time analysis results.
